## NEWS RELEASE

### **Eurasian Minerals Files NI 43-101 Technical Report on Initial Resource Estimate for the Malmyzh Copper-Gold Porphyry Project, Far East Russia**

Vancouver, British Columbia, July 13, 2015 (TSX Venture: EMX; NYSE MKT: EMXX) – Eurasian Minerals Inc. (the “Company” or “EMX”) is pleased to announce that the National Instrument 43-101 *Standards of Disclosure for Mineral Projects* technical report titled "NI 43-101 Technical Report on the Initial Mineral Resource Estimate for the Malmyzh Copper-Gold Project, Khabarovsk Krai, Russian Federation" (the "Report") dated July 10, 2015 has been filed on SEDAR at [www.sedar.com](http://www.sedar.com) and on the U.S. Securities and Exchange Commission’s website at [www.sec.gov](http://www.sec.gov). The Malmyzh exploration and mining licenses are held by a Joint Venture between IG Copper LLC (“IGC”) (51%) and Freeport-McMoRan Exploration Corporation (“Freeport”) (49%), with IGC operating and managing the project. EMX is IGC’s largest shareholder with 42.2% of the issued and outstanding shares (40.0% on a fully diluted basis) resulting from investments totaling US \$7.8 million.

The Report, with an effective date of May 1, 2015, was prepared by Phil Newall, PhD, BSc, CEng, FIMMM, a Qualified Person under NI 43-101 and Managing Director of Wardell Armstrong International (“WAI”), an independent UK based mining, engineering, and environmental consulting company. WAI’s Malmyzh mineral resource estimate, announced in EMX’s May 26, 2015 news release and described in the Report, conforms with CIM “Estimation of Mineral Resource and Mineral Reserves Best Practices” guidelines and was prepared in accordance with NI 43-101. There are no material differences between the results announced in the news release and results contained in the Report. Dr. Newall is independent of EMX, IGC, and Freeport.

IGC’s partner, Freeport, did not participate in completion of the resource estimate or the Report, and is subject to disclosure requirements that are different than EMX’s and IGC’s disclosure requirements. Accordingly, future disclosures concerning the Malmyzh project by Freeport, if any, may contain different or additional information as required by relevant laws, regulations and requirements.

Mr. Dean D. Turner, CPG, is a Qualified Person under NI 43-101 and consultant to the Company. Mr. Turner has reviewed, verified and approved the information contained in this news release.

**About EMX.** Eurasian Minerals leverages asset ownership and exploration insight into partnerships that advance our mineral properties, with EMX retaining royalty interests. EMX complements its generative business with strategic investment and third party royalty acquisition.

EMX’s strategic investment in IGC exemplifies the Company’s recognition of an early-stage opportunity with excellent growth potential. IGC has steadily built value at the Malmyzh copper-gold porphyry project, while continuing to add quality exploration properties to its portfolio.

**About IGC.** IGC, a privately held company, is led by President and CEO Tom Bowens, and includes key personnel with a track record of exploration discovery and project development in the Russian Federation.

### **Forward-Looking Statements**

This news release may contain “forward looking statements” that reflect the Company’s current expectations and projections about its future results. These forward-looking statements may include statements regarding perceived merit of properties, exploration results and budgets, mineral reserves and resource estimates, work programs, capital expenditures, timelines, strategic plans, market prices for precious and base metals, or other statements that are not statements of fact. When used in this news release, words such as “estimate,” “intend,” “expect,” “anticipate,” “will”, “believe”, “potential” and similar expressions are intended to identify forward-looking statements, which, by their very nature, are not guarantees of the Company’s future operational or financial performance, and are subject to risks and uncertainties and other factors that could cause Eurasian’s actual results, performance, prospects or opportunities to differ materially from those expressed in, or implied by, these forward-looking statements. These risks, uncertainties and factors may include, but are not limited to: unavailability of financing, failure to identify commercially viable mineral reserves, fluctuations in the market valuation for commodities, difficulties in obtaining required approvals for the development of a mineral project, increased regulatory compliance costs, expectations of project funding by joint venture partners and other factors.

Readers are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date of this news release or as of the date otherwise specifically indicated herein. Due to risks and uncertainties, including the risks and uncertainties identified in this news release, and other risk factors and forward-looking statements listed in the Company’s MD&A for the three-month period ended March 31, 2015 (the “MD&A”) and most recently filed Annual Information Form for the year ended December 31, 2014 (the “AIF”) and Form 20-F for the year ended December 31, 2014, actual events may differ materially from current expectations. More information about the Company, including the MD&A, the AIF, financial statements and Form 20-F of the Company, is available on SEDAR at [www.sedar.com](http://www.sedar.com) and on the SEC’s EDGAR website at [www.sec.gov](http://www.sec.gov).

### **Cautionary Note to U.S. Investors Concerning Estimates of Inferred Resources**

This news release uses the term “Inferred Resources”. We advise U.S. investors that while this term is defined in, and permitted by, Canadian regulations, this term is not a defined term under SEC Industry Guide 7 and not normally permitted to be used in reports and registration statements filed with the SEC. “Inferred Resources” have a great amount of uncertainty as to their existence, and great uncertainty as to their economic feasibility. It cannot be assumed that all or any part of an Inferred Mineral Resource will ever be upgraded to a higher category. Under Canadian rules, estimates of Inferred Mineral Resources may not form the basis of a feasibility study or prefeasibility studies, except in rare cases. The SEC normally only permits issuers to report mineralization that does not constitute SEC Industry Guide 7 compliant “reserves”, as in-place tonnage and grade without reference to unit measures. U.S. investors are cautioned not to assume that any part or all of mineral deposits in this category will ever be converted into reserves. U.S. investors are cautioned not to assume that any part or all of an Inferred Resource exists or is economically mineable.
